Response to RCE and Amendment

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. § 103 which forms the basis for all obviousness rejections set forth in this Office action:

A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Subject matter developed by another person, which qualifies as prior art only under subsection (f) or (g) of section 102 of this title, shall not preclude patentability under this section where the subject matter and the claimed invention were, at the time the invention was made, owned by the same person or subject to an obligation of assignment to the same person.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. § 103, the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 C.F.R. § 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of potential 35 U.S.C. § 102(f) or (g) prior art under 35 U.S.C. § 103.

Claims 1-11 are rejected under 35 U.S.C. § 103 as being unpatentable over Wolgemuth et al. in view of Larson et al. The patent of Wolgemuth et al. in Figures 1-4 discloses all the claimed features of the invention with the exception of spring clips and recesses in the heat sinking member.

Art Unit: 3743

The patent of Larson et al. in Figures 6-7 discloses that it is known to have spring clips and recesses in a heat sinking member for the purpose of securing an electronic device to the heat sinking member. It would have been obvious at the time the invention was made to a person having ordinary skill in the art to employ in Wolgemuth et al. spring clips and recesses in a heat sinking member for the purpose of securing an electronic device to the heat sinking member as disclosed in Larson et al.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
